NOTES

Submit an original, and a duplicate for fee processing.

FILING QUALIFICATIONS: The prior application must be a nonprovisional application that is either: (1) complete as defined by 37 C.F.R. 1.51(b), or (2) the national stage of an international application in compliance with 35 U.S.C. 371. A Notice will be placed on a patent issuing from a CPA, except for reissues and designs, to the effect that the patent issued on a CPA and is subject to the twenty-year patent term provisions of 35 USC 154(a)(2). Therefore, the prior application of a CPA may have been filed before, on or after June 8, 1995.

C-I-P NOT PERMITTED: A continuation-in-part application cannot be filed as a CPA under 37 C.F.R. 1.53(d), but must be filed under 37 C.F.R. 1.53(b).

EXPRESS ABANDONMENT OF PRIOR APPLICATION: The filing of this CPA is a request to expressly abandon the prior application as of the filing date of the request for a CPA. 37 C.F.R. 1.53(b) must be used to file a continuation, divisional or continuation-in-part of an application that is not to be abandoned.

ACCESS TO PRIOR APPLICATION: The filing of this CPA will be construed to include a waiver of confidentiality by the Applicant under 35 U.S.C. 122 to the extent that any member of the public who is entitled under the provisions of 37 C.F.R. 1.14 to access to, copies of, or information concerning, the prior application may be given similar access to, copies of, or similar information concerning, the other application or application in the file jacket.

35 U.S.C. 120 STATEMENT: In a CPA, no reference to the prior application is needed in the first sentence of the specification and none should be submitted. If a sentence referencing the prior application is submitted, it will not be entered. A request for a CPA is the specific reference required by 35 U.S.C. 120 and to every application assigned the application number identified in such request, 37 C.F.R. 1.78(a).

Preliminary Amendment

Sir:

In response to the Official Action dated 14 November 2002 Applicant is submitting its request for continued prosecution. A petition to extend the period for response to the Official Action by three (3) months was filed under separate cover.

In the claims:

Please cancel claims 5 and 12.

Claim 3, 7, 8 and 9 are to be amended to read as follows:

3. (Amended) An integrated high-ohmic polycrystalline SiGe resistor,
comprising:

a substrate;

a dielectric substance;

a resistance layer on the dielectric substance and consisting of a polycrystalline layer of a material selected from the group consisting of SiGe and SiGe:C; and
electrical contacts.

7. (Amended) A method of fabricating an integrated high-ohmic polycrystalline SiGe resistor, comprising the steps of:
providing a substrate comprising silicon;
precipitating a dielectric substance on the substrate;
precipitating and doping on the dielectric substance a layer of material selected from the group consisting of SiGe and SiGe:C;
further precipitating the dielectric substance on the layer; and
fabricating metallic contacts.

8. (Amended) The method of claim 7, wherein the layer is precipitated in polycrystalline form.

9. (Amendment) The method of claim 7, wherein the layer is precipitated in amorphous form.

Amendment

The claims as hereby amended clearly distinguish Applicant's invention from the prior art of record. In particular, EP 0,116,702, while it discloses a silicon based polycrystalline resistor containing carbon. However, the '702 patent does not teach the fabrication of polycrystalline resistor layer made of SiGe or SiGe doped with C, nor does it teach such a resistor *per se*.

The above changes to the claims do not add new matter to Applicant's original disclosure.

It is earnestly urged that as amended the instant application is in condition
for allowance which is courteously solicited.

Respectfully submitted,

Karl Hormann
